

Alternative Splicing Event
(in isoform used more)

MES gain
(paired with MES loss)

MEE gain
(paired with MEE loss)

IR gain
(paired with IR loss)

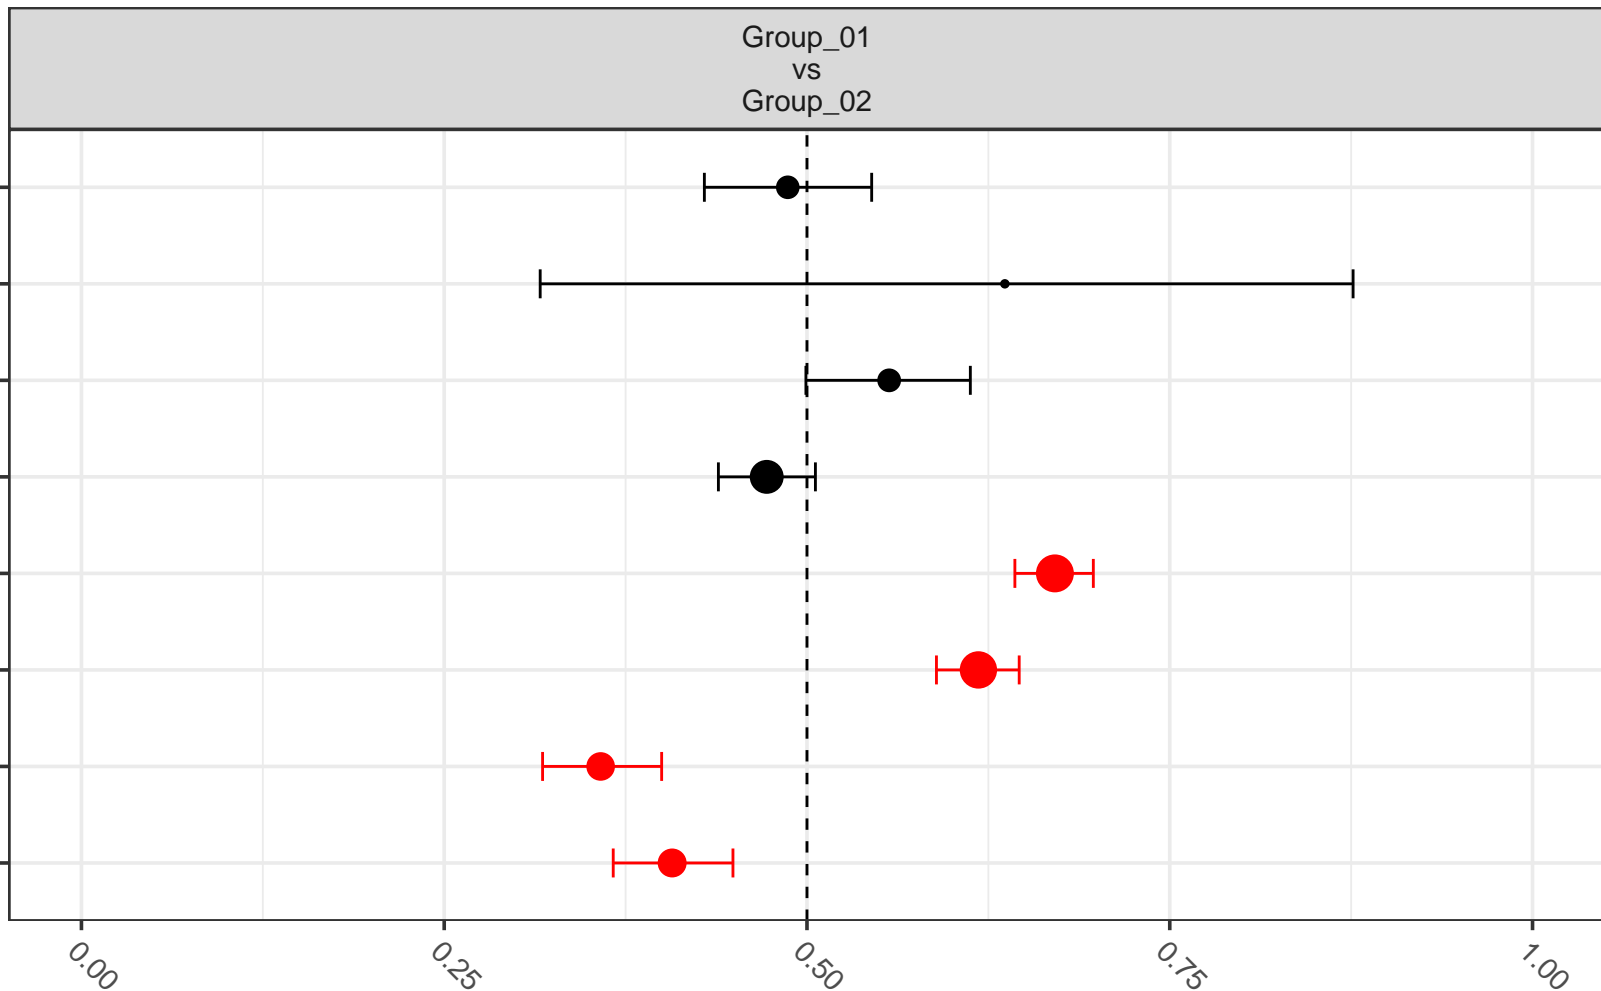

ES gain
(paired with ES loss)

ATTS gain
(paired with ATTS loss)

ATSS gain
(paired with ATSS loss)

A5 gain
(paired with A5 loss)

A3 gain
(paired with A3 loss)

Fraction of Switching Genes Primarily
Resulting in The Alternative Splicing Event Indicated
(With 95% Confidence Interval)

FDR < 0.05
